Married to Karen.

Family: One daughter and one son.

Hamline University in St. Paul was my first and most important experience after High School. There I decided to make Chemistry my career and there I met my wife of nearly 46 years, Karen.

After teaching Chemistry and Physics for two years in Montevideo, Minnesota and expanding the family by our daughter, Kristen; we packed up and moved to Detroit, Michigan for a year of graduate work. I got my Master's degree in Organic Chemistry from Wayne State and my family was expanded again with the addition of our son, Bjorn.

From grad school I moved to the 3M company where I worked as a chemist/chemical engineer for the next 35 years, mostly in the area of magnetic tape recording. During that time our daughter also went to Hamline. Then she worked for the government in Washington, D.C. She is now a very successful lobbyist and has two children of her own.

*Jeffery Johnson – Continued*

Our son, after graduating from St. Cloud State, made a career in the Army as a helicopter pilot. I am proud to say Major Johnson has been all over the world. He also has given us two grandchildren.

We have indeed been blessed with a happy, productive life. We are now retired and living full time in Ft. Myers, Florida. Coming our way? Stop by. The pots always on and there's a cold one in the fridge.
